

From Russia with Love

to Leonid Grishchuk on the occasion of
becoming Honorary Distinguished Professor
17 April, 2009

performed by *Bernie and the Gravitones*

From Russia with love he flew to you,
Much wiser since finding Gee Mu Nu.
His theories of spacetime waves were just
His gift from Russia with love.
He's seen Moscow,
Boulder, and even Saint Louie.
But oh, Cardiff welcomed him so.
Though he argued, blew steam,
He still let his love for us show -
We dared not say no.
His theories were strange, but now and then,
We saw he was right and cheered again.
His running around is through -
He flies to you from Russia with love.
